WEATHER GUIDE.

The following Table (the result of many years' actual observation) is ascribed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters:—

Moon.	Time of Change.	In Summer.	In Winter.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens	Between midnight & 2 A. M. }	Fair.	Hard Frost unless
	" 2 and 4 A. M. }	Cold with showers.	wind be S. or W.
	" 4 " 6 " }	Rain.	Snow and stormy.
	" 6 " 8 " }	Wind and rain.	Stormy and rainy.
	" 8 " 10 " }	Variable.	Stormy.
	" 10 " 12 " }	Showery.	Rain if wind W.
	At 12 Noon, and to 2 P. M. }	Very rainy.	Snow if E.
	Between 2 and 4 P. M. }	Variable.	Cold and high wind.
	" 4 " 6 " }	Fair.	Snow or rain.
	" 6 " 8 " }	Fair if wind be N. W. }	Fair and mild.
	" 8 " 10 " }	Rainy if S. or S. W. }	Fair.
	" 10 " midnight.	Ditto. Ditto.	Frosty if wind N or N
		Fair.	E. Snow if S or S W
			Ditto. Ditto.
			Fair and frosty.

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week; the nearer noon any of these changes happen, the more foul and wet will be the weather that follows.

 AND SEWING MACHINES.**

The Subscriber would especially draw the attention of his friends and the public generally to the "WHITE," and "NEW WILLIAMS," Kings of American and Canadian Sewing Machines, which he will sell very cheap, Wholesale and Retail, on the most favorable terms.

Please call and see or send for descriptive circular, as the first-class Sewing Machines are sold by me or my agents at a LOWER PRICE than many of the great number of common machines now in the market.

Yours very truly,

ROBERT WALLACE.

EXPLANATORY.

Aphelion—that part of a planet's orbit *farthest* from the Sun.

Perihelion—that part of a planet's orbit *nearest* the Sun.

Elongation—angular distance of a planet from the Sun, as seen from the Earth.

Penumbra—a partial shadow resulting from the diminished light of the sun to the earth or moon, during a solar or lunar eclipse, appearing as partial.

Declination—the distance of a heavenly body from the equinoctial line.

Ecliptic—the plane of the earth's orbit nearest the sun.

☾ Apogee—greatest distance from the earth.

☾ Perigee—least distance from the earth.

The Astronomical day is reckoned from Noon to Noon through the 24 hours. Thus July 21, 9h. is 9h. A. of July 21st, and July 21st, 15h. is 3h. M. of July 22.

The Sun's Declination and Equation of Time are given for Noon at Halifax, Apparent Time, i.e. when the True Sun is on the meridian.

The Moon's Southing is given in Astronomical Time for the Meridian Passage at Halifax; and her declination when on that meridian.

Both the rising and setting of the Moon are given for every day in the year.

THE TIDES.

The Tides in the Calendar given for the Ports mentioned, are the tides that occur during the day. In the Tide Table (page 53) will be found constants for finding the time of High Water at each of the places mentioned in the Table.

The Times of High Water given in the Calendar have been corrected for the varying distance of the Moon from the Earth, and also for her angular distance from the Sun. They can now be depended on as accurate to at least the same degree as the Admiralty Tide Tables.

It will sometimes be found that when a constant is added to the time of High Water at Halifax, the sum exceeds 12 hours; in this case subtract 12 hours from the sum, and the remainder will be the time of High Water at the required port on the following afternoon or morning, according as the Tide at Halifax was a morning or afternoon Tide.

Rheumatism in the hands, after seven years' suffering,

EXAMPLE.

High Water at Halifax, Jan. 16th 11h. 55m. M.
Boston Light, U. S., add 3h. 22m.

15h. 17m.
Subtract 12h. 0m.

High Water at Boston, June 16th, 3h. 17m. A.

It will sometimes be found that a constant to be subtracted is greater than the Time of High Water at Halifax; in this case add 12 hours to the time at Halifax, subtract the constant, and the remainder will be the time of High Water at the required Port for the previous Morning or Afternoon, according as the tide at Halifax was an Afternoon or Morning Tide.

EXAMPLE.

High Water at Halifax, Jan. 2, 0h. 11m. A.
Add 12h.

12h. 11m.
Cape Sable Island, S. side, Subtract 1h. 19m.

High Water at Cape Sable Island, Jan. 2 10h. 52m. M.

To find the length of the day,—subtract the time of sunrise from 12 hours, and to the difference add the time of sunset.

EXAMPLE.

12h. 0m.
Sunrise, June 21st, 4h. 19m. Subtract.

Difference, 7h 41m.
Sunset, June 21st, 7h 44m. Add.

Length of day, June 21st, 15h. 25m. The longest day.

To find the length of the night,—subtract the time of sunset from 12 hours, and to the difference add the time of sunrise next morning.

EXAMPLE.

12h. 0m.
Sunset, July 1st, 7h. 44m. Subtract.

Difference, 4h. 16m.
Sunrise, July 2nd, 4h. 24m. Add.

Length of night, July 1st, 8h. 40m.

In this Almanac all the times except for Moon's Southing are Mean Time at Halifax, i. e., Civil Time. The Moon's Southing is given for Astronomical Time at Halifax.

Standard Time is 15 minutes earlier than Halifax Mean Time, and the Railway Time one hour later than Halifax Standard Time.

PARK'S COTTON MANUFACTURES.

Awarded the ONLY MEDAL given at the Centennial Exhibition for Canadian Yarns.

And the GOLD MEDAL for Cotton Goods at the Dominion Exhibition at Montreal; and First Prizes at Toronto, Hamilton and London Exhibitions of 1880 and 1881; and First Prize Medals at Toronto, Montreal and Kingston Exhibitions of 1882, and St. John, 1883, and the ONLY GOLD MEDAL awarded at Toronto 1885.

COTTON YARNS,

Nos. 3's to 10's.

White, Blue, Orange, Green and Red.

Made of Good American Cotton, with great care, correctly numbered and warranted full length and weight

We find it necessary to call the attention of those who use COTTON YARN or WARP to the fact that the YARN made by us is the

ONLY WATER-TWIST YARN

made in the Dominion—no other mill having the machinery on which to make it.

Our Yarn is consequently very much superior for weaving purposes to any other in the market—a fact which is well-known to those who have used it for the PAST TWENTY YEARS.

All our Yarns have our name upon the label and none other are genuine.

COTTON CARPET WARP, Made of No. 9's Yarn Twisted.

White, Red, Green, Blue, Brown and Orange.

Each 5 lb. bundle contains 9,000 yards in length, and makes a length of carpet in proportion to the number of ends in width.

BALL KNITTING COTTON, In all Numbers & Colors, put up in 1½ oz. Balls.

1½ lbs. in each box, made from the finest long staple cotton, especially selected for the purpose. This cotton is very carefully spun, and will be found to be evenly made and correctly numbered. Particular care is taken to have the dyeing and bleaching perfectly done. FULL WEIGHT IN EVERY BALL.

COTTON HOSIERY YARN, Suitable for Manufacturers of Hosiery.

Better than any other made and so acknowledged by all who have used them. These goods are supplied to all the first-class Manufacturers in the Dominion.

JANUARY.—Our FARMER'S CALENDAR is intended as a monthly guide or reminder of field work, indoor operations, and of farm matters in general, that require attention during the progress of the year. These notes are not written for the purpose of furnishing new, or original, or merely theoretical, information, but rather as practical hints to intelligent Agriculturists already familiar with the science and practice of their profession. A fact known to every farmer is that no two seasons are the exact counterparts of each other, and the farmer or gardener or fruit-grower will be most successful whose crops are selected, and operations carried on, in view of such variations. Crops that ripen well one season may not do as well on the same farm the next, and hence a judicious choice should be made.

Some crops thrive best in a moist, cool season, others in one with prolonged hot weather, some do best when they have an early start in the spring season, whilst others require along, genial autumn to form their fullest yield. Thus, of our more important crops, Indian Corn, Potatoes, Tomatoes, Squashes, and others of Southern origin, do best in a hot season, while oats, grass, turnips, cabbages and such-like northern crops, make most growth in comparatively cool weather. The preparation of the ground, and sowing, should always be performed with due regard to the temperature of the former. At this season young cattle should receive special attention, being groomed, as well as fed and watered, regularly, and thus prepared for passing through the winter in robust healthy condition. Neglect at this season will show itself all through the winter.

FEBRUARY is the most trying month for cattle. We would repeat the advice given for their care in January; we cannot, in fact, too strongly impress the necessity of care in their feeding, watering, and general treatment, at this season of the year. Barns may be faulty, and the cold severely felt, and yet this is one of the least evils in Nova Scotia, for horned cattle require plenty of fresh air, and winter and spring rates of mortality in cows in the country barns is very low compared to that of the apparently comfortable, substantial, wind-tight stables of the City of Halifax. The root cellar may be troublesome to get at, and the animals may thus miss an occasional meal; the wells may be frozen, and the way to watering places may be so slippery that the cattle cannot reach them without discomfort or positive accident. In order to overcome these and many other difficulties that appear in February, it is a good rule to give extra time and attention to the stock. In feeding grain and meal always mix them into cut hay, moistened. In districts where an Agricultural Society does not already exist this

is a good time to organize. Farmers have leisure to attend a meeting, and take steps for organization. Notification has to be made to the Office of Agriculture, so that the new Society may be sanctioned by the Governor-in-Council, before the end of June, in order to qualify for the grant for the year.

MARCH.—The Nova Scotia climate is singularly well adapted for the growth of Garden Vegetables and Root Crops,—yet one of the most lamentable wants on our Nova Scotia farms is the kitchen garden. Instead of finding on every farm a well furnished kitchen garden, filled with vegetables and small fruits, sufficient to provide for the family wants during the year, such an inexpensive luxury is the exception rather than the rule. There is no reason why every farmer's family should not be provided to a large extent with supplies from the garden, such as early salads in spring time, rhubarb for pies, early green peas, early turnips, lettuce, radishes, cucumbers, early cauliflowers and cabbages, early beans, gooseberries, currants, strawberries, raspberries, (not the watery, wild kinds that grow about

The nature of our climate necessitates the use of hot-beds for raising seedling plants of those crops that require a long season to mature. A hot-bed is made by piling on successive layers of well-chopped horse-dung, obtained from a stable where oats are freely fed. The manure may be raised to a height of two or three feet above the surface of the soil. On top, spread four or five inches of very fine and rich soil mixed with sand; this should have been prepared in the fall, and kept dry under cover all winter,—otherwise it is likely

now to be in a hard, frozen mass. The glass sashes are then to be put on and kept close till the hot-bed heats; the steam and heat will start the seeds of weeds, which may be allowed to grow. Air is then given, and, when the heat modifies, weed and rake the surface; sow your spring seeds,—califlowers, cabbages, celery, tomatoes, &c., for the kitchen garden; and stocks, verbenas, petunias, asters, balsams, and such like annuals, for flower garden ornament. The seeds will bear a good deal of heat before they emerge from the soil, but, as soon as the first leaves begin to appear, the frame must be aired daily, taking care to avoid draughts and exposure to bright sunshine; a newspaper laid over the seed bed forms a convenient shade.

SMITH'S ROSE TOOTH POWDER prevents decay.

APRIL.—Ploughing, planting and seeding, should be pushed on with as much expedition and vigor as the weather will allow: the farmer should be ready to anticipate the advantages arising from early work. Early in the month, if the fields are not fit for ploughing or sowing, preliminary operations may be performed. Manure under cover may be carted out on the frozen soil. In fields seeded down with timothy last fall, it will now be time to sow clover,—a mixture of red and alsyke is the best for hay. Where early potatoes are required, the seed should be kept in a warm place so as to start the eyes, and, whenever the ground is dry enough, they may be planted. This advice if not heeded will lead to potatoes coming up scantily, many rotting in the ground. If farmers, instead of planting inert seed potatoes, taken out of a cold cellar, would first allow the eyes to start, there would be fewer complaints of the seed perishing in the soil. Peas and

broadbeans may be sown at the very beginning of the month; onions, parsnips and carrots, as soon as the ground is fit to be worked sufficiently to give them the more delicate seed-bed they require. Beets and mangel wurzel are usually sown at the end of the month or early in May. All gooseberry and currant bushes should be dressed, apple and pear trees gone over, and, generally, the whole kitchen garden and orchard thoroughly cared for.

MAY.—If the season is not an unusually early one, some ploughing will still have to be done; let it be done at once; if manure has to be taken out for crops, don't wait for a more convenient season; if the weather is not all that is desired, proceed nevertheless with your work, vary it to suit the state of the soil and atmosphere. Men cannot fight successfully against the operations of nature, but they can very often turn them to advantage by consideration and forethought. What has to be sown and planted this month? *Everything*, except what has

either already been committed to the soil, or is too tender to withstand the coldness, or the probable frosts. Such exceptional crops are bush-beans, pole-beans, corn, tomatoes, cucumbers, squash; it is only in warm, sandy soils that such things can safely be put out before the end of the month. Turnips also should not be sown in May, except the small garden patch of early whites for household use. One of the principal marketable crops in Nova Scotia is the potato. It has been found advantageous of late years to plant as early as possible; as soon, therefore, as the ground is in fit condition, commit the potato to it; see however, that the eyes of the seed have started into growth, otherwise it will be apt to rot

in the cold seed bed. In light land the manure (old and well rotted) may be ploughed in before planting. In heavy soils, put the manure in the drills, so that the warmth of the air may counteract the deadening effect of the cold wet clods. Superphosphate and other artificial fertilizers may also be used.

JUNE.—Planting and sowing will still continue, and much of such work has, in unfavourable seasons, to be accomplished in June. Corn for ensilage should now be sown. But, while spring operations have to be continued and finished this month, there are others appertaining more especially to the summer that have to be attended to. Garden crops will require hoeing and weeding; potatoes also, when sufficiently advanced. It should not be forgotten that we have not only to sow and cultivate, but also to protect our crops, if we would gather in a profitable harvest. In localities subject to late spring frosts, it is easy to protect early crops by throwing

some spruce or other brush over them on cold nights. A method much used in France, and which may easily be adopted in this country, is to burn brush to windward so as to cover the field with a cloud of smoke. Attention has often been called to such simple and costless devices, and yet, year after year, we hear of the loss of early crops; it is said "by frost," we should say "by neglect." During the past year the Colorado Beetle and Potato Bug appeared in great strength over a large extent of the Province, and may be expected to prove a formidable foe to the potato crop during the season of 1891. It will, therefore, be necessary for every farmer to be vigilant in checking this pest from its very first appearance. It is not too early to look for the first brood in June. The hard shells are the parents that lay the eggs on the potato leaf, and should be collected and destroyed, before they have opportunity to do so. The young may be got rid of by dusting

with quick lime, if this is done when they are sufficiently young. If allowed to attain a fair size, they must either be collected by brushing them into a tin, and then destroying them,—a by the use of poison. It is only in very bad cases that poison is really necessary, and its indiscriminate use should be discouraged, especially London Purple. It will cost from one to two dollars for a man to go twice over an acre of potatoes, knocking the bugs into a tin pan, and then killing wholesale; this is better than poisoning the field, and risking the accidents that may arise. As soon as the currant and gooseberry bushes have pushed out their first leaves and early blossoms, it will be found advantageous to give them a sprinkling of white hellebore powder in the morning before the dew is off. This will destroy the first crop of currant worms, and thus preserve the bushes and the fruit crop for the season. The objection to the use of white hellebore on currant bushes (if used early enough in the season) is by no means so strong as to the employment of arsenical poisons, as the white hellebore being organic, decays, and is thus speedily rendered innocuous, by exposure to rain and air.

Summer bedding plants are set out in the flower garden as early this month as the weather will allow; verbenas may be put out very early, and they thrive rather better in the moist cool weather of early June than later, when the soil is apt to be baked by the sun. Stocks are also very hardy. Balsams, Phloxes, Petunias, Geraniums, Heliotropes, and other tender things need not be put out so early.

JULY.—Plowing, sowing, and planting have now been completed. This month is especially devoted to the cultivation of the various field crops. Cultivation in this restricted sense, means the hoeing of crops, stirring by cultivators and harrows, and such like implements, between or over the drills, hilling up and

moulding. The objects of these operations are to destroy weeds, to keep the soil open, and thus to promote the decomposition of the manure, enable the soil to obtain moisture, allow free access of air, bring the soil well over and around the roots and stems, and, by these several means, to ensure vigorous growth. We are apt to have a good many rainy days in July, and, as most of the hoeing work has to be compressed between planting time and haying time, haying has occasionally to be begun before potato hoeing is completed; this occurs on many of the best regulated farms. In ordinary seasons it is sure to occur on a farm where fore-sight is not shown, hence the miserable root crops we so often see. Let our farming readers then be careful to forecast the weather probabilities in light of the July work to be done on the growing crops, and thus avoid the disastrous loss that comes from neglect. The sowing of turnips is usually recommended for the month of June, but as the ground has to be remarkably fine for this crop, and as turnips are often put in to fill up land that was originally intended for the earlier sown roots, it frequently happens that turnips have to be sown in July. even prefer to sow their Swedes early this month, so as to avoid the "fly," and the soft turnips for immediate feeding need not necessarily be sown till the end of July, although, if they get warm genial weather to start with they do much better earlier. It is a fact, however, that late sowing, while it is apt to give a small yield, ensures excellent quality, and freedom from fibre, so that turnips intended for table use in winter, should never be sown early. The ground should have undergone a thorough pulverization. Light sandy soil is the best for turnips. They start better after the ground is warm, but the bulbs swell most rapidly during the cold dewy nights in Autumn. The soil cannot be worked too deep or made too fine for turnips. Town manures are valuable for this crop and crushed

August.—Hay-making is the most important operation of the Nova Scotia farmer, half of all the land under crop of every kind being occupied with grass destined to be made into hay. More than half a million acres have to be mown every season. Our haying season usually begins in the extreme western part of the Province, early in July, but later in the eastern counties, and especially where the land is heavy. In Yarmouth, Digby and Annapolis Counties it may be finished by the end of July; but in most other counties it is carried over into the month of August. Where suitable implements and appliances are used, there is

now no difficulty in securing the crop. After haying there will be work in the garden and orchard. Where the trees are in grass they will benefit by a rich top dressing around their roots. Look after the ripening fruit, destroy caterpillars, if any still remain; pick the early August apples, and send them into a local market, or to the pic-nic. When the rain comes beds of strawberries may be made up. See that the ground is well drained and enriched with old manure. Mushrooms now appear in horse pastures, house flies become troublesome, and the swallows congregate in flocks and leave us.

SEPTEMBER.—Haying was finished in August, and probably all the grain will be harvested in September. During this month, Indian Corn will have to be cut and put into the silos; fortunately these are now on the increase in this Province. The ensilage forms an excellent supplement to the hay and roots

upon which our cattle were fed too exclusively in former years, but ensilage is still used to only a very small extent. Later in the month, potatoes, of the earlier kinds, and earlier planted, will be ready to be taken up, but, while the weather remains warm, they should be well dried and aired before being put into the cellar, and only in small quantities at a time. The most experienced farmers usually wait for cold weather before taking up their full crop. The farmer's year is a complete circle, and, before one year's annual harvest is taken in, it is needful to be preparing for the next. In fact, it is already time, by the beginning of September, to sow Winter Rye, which is a favorite crop with some of our farmers. The Provincial Agricultural Exhibition is usually held during this month, and will be looked forward to with interest by every improving agriculturist, whether an intending exhibitor or a mere spectator seeking information as to the latest novelties and improvements in his profession.

OCTOBER.—The apple crop is yearly acquiring increased importance in Nova Scotia, and our Apple Orchards are annually extending. But there is still plenty of room, and no farmer can make a better permanent investment than by planting an orchard. The best market varieties, at least those that appear at present to be most in favor among our fruit growers, are: Gravenstein, Yellow Bellefleur, King of Tompkins, R. I. Greening, Ribston Pippin, Northern Spy, Vandevere, Golden Russet, Nonpareil and Baldwin. Strawberries and Raspberries, on account of their perishable character, are limited to local markets. But Pears, Plums, and Cherries may be grown in any quantities for foreign markets. Digby County

of male animals for the use of members. If the selection and purchase of animals required for the season be deferred till Spring time, large prices have to be paid, and suitable animals are not always obtainable. For beef cattle the Short Horn Durham, Polled Angus, Galloway, and Hereford are used. For milk alone, Ayrshires are to be preferred, Devons make the best working oxen, are quick, active, and easily fed, and soon fatten in the wild pastures for beef. For domestic cows, the creamy Guernseys or Jerseys are the most suitable. The Jerseys have been great favorites, and their increase will promote the manufacture of butter, but it threatens to lessen our capacity for beef production. Holsteins are also increasing, but less rapidly, in a few localities; they are large, healthy cattle, combining beef producing with milking qualities,—the yield of milk being often very large. As soon as the root crops are cleared off the fields,

Towards the end of the month, Venus is visible in the evening. Mars is a morning star. Jupiter is an evening star.

The late Nisbet's Prescriptions at Smith's Drug Store.

the farmer should employ his whole strength in fall ploughing. Whether on old or new land, fall ploughing is a most important operation. Without it a farm cannot be worked to advantage. After ploughing, do not forget to go carefully over the water furrows to make way for the exit of the rain and melting snows that are sure to flood your fields before seed time. A well ploughed, well drained field may be sown in spring as soon as the frost is gone, while one that is irregularly ploughed, or has no water furrows, may long remain a puddle, defying every attempt to improve its condition, until the season has so far advanced as to reduce very much the prospect of a crop. The best part of what is too often left to be "Spring work," can be done in the month of November. At the same time care should be taken not to open up gravelly or hilly land subject to be scoured by the Fall and Spring rains, or melting snows.

XMAS CARDS AT SMITH'S DRUG STORE.

DECEMBER.—Agricultural improvement is encouraged and promoted in various ways by the Provincial Legislature. Grants are given to aid County Exhibitions, and once in three years to enable a Provincial Exhibition to be held. There is also a system of Agricultural Societies throughout the Province, with a membership of about six thousand farmers; each society is entitled to draw from the Provincial Treasury an annual grant in aid to promote its operations. The special purpose of a Society is to improve the live stock of its district, which is accomplished by obtaining and keeping for the use of members, superior male animals, such as bulls, rams and boars. Societies may also, by special permission, introduce seeds of new varieties of grain, roots, and also improved implements, and

Postage Stamps, Post Cards, etc., issued by the Canadian P. O. Department.

The stamps issued by the Canadian Post Office Department, are of the following denominations, viz.: postage stamps, $\frac{1}{2}$ c., 1 c., 2 c., 3 c., 5 c., 6 c., 10 c., $12\frac{1}{2}$ c. and 15 c.; registered letter stamps, 5 c.

Post Cards are issued at one cent each, and may be sent to any address in Canada or United States. Reply Post Cards (2 cts.) may be sent to any address in Canada. Post cards are also issued at two cents each for transmission to the United Kingdom, Newfoundland, St. Pierre et Miquelon, and certain foreign countries. Post Bands are for sale at the rate of \$1.25 per hundred

Rates of Postage within the Dominion.

LETTERS.

To places within the Dominion of Canada, 3 cents per oz. each. Short paid letters will be taxed with double the amount of the deficient postage. Letters wholly unpaid will be sent to the Dead Letter Office.

On letters posted at an Office to be delivered from it, commonly known as Local or "drop letters," the rate will be 1 cent per oz.; but where there is a free delivery by letter carrier, the rate will be 2 cts. per oz.

Re-directed Letters will be forwarded without any additional charge if not taken from the office or if handed back at the moment of their delivery, but if taken from the office and subsequently re-posted they become subject to a new rate of postage, in default of which they will be sent to the Dead Letter Office, Ottawa.

NEWSPAPERS AND PERIODICALS.

Newspapers and periodicals printed and published in Canada may be sent by Post from the Office of publication to regular subscribers in Canada free.

Transient Newspapers and Periodicals addressed to places in Canada, will be sent at the rate of one cent per 4 ounces, which must be prepaid by postage stamp. Newspapers and Periodicals weighing less than one ounce may be posted singly, prepaid by postage stamp, one half ct. each.

CLAYTON & SONS, Complete Lines in Boys' and Men's Clothing, Top Shirts, Under Shirts and Furnishings

MISCELLANEOUS MAIL MATTER.

The rates of postage upon all books, pamphlets, occasional publications, printed circulars, prices current, hand bills and other material wholly in print, and on packages of seeds, bulbs, roots, scions or grafts, patterns or samples of goods or merchandise, is *one cent per four ounces* or fraction thereof, to be prepaid by postage stamp or stamped postband or wrapper.

Upon all books and newspaper manuscripts, printers' proof-sheets, whether corrected or not, maps, prints, drawings, engravings, lithographs, photographs, when not on glass or in cases, containing glass, sheet music whether printed or written, documents partly printed or written, not being letters or intended to serve the purpose of letters—such as deeds, insurance policies, militia and school returns, or other documents of like nature—and on all miscellaneous matter transmissible by post, not otherwise provided for—the rate of postage is *one cent for each two ounces* or fraction of two ounces, to be prepaid by postage stamp or stamped post band or wrapper.

Prepayment of Matter of the above description is in all cases compulsory.

PARCELS.

Closed parcels weighing not more than 5 lbs., may be sent to any place within the Dominion at the rate of 6 cts. per 4 oz. Parcels open to inspection and weighing not more than 4 lbs., may be forwarded at the rate of 1 cent per oz.

REGISTRATION FEE.

To places within the Dominion, 5 cents on all classes of mail matter. Information in regard to the rules governing registered correspondence, etc., may be had at any Post Office.

a Same rates and regulations as such matter passing within Canada.

Letters containing gold or silver money, (excepting such addressed to the United States) jewels, or precious articles, or anything liable to Customs duties, will not be forwarded, *registered or unregistered*, to any place beyond the limits of the Dominion of Canada.

Newspapers and periodicals printed and published in Canada may be sent by post from the *office of publication or news agency*, to regular subscribers or news agents in the United States, free; to the United Kingdom, 1c. per lb.

Newspapers if sent singly, must be prepaid at the newspaper rate, but they may be sent in packets paid collectively at book post rate, or by newspaper rate, but if at newspaper rate, each paper must be paid the same rate as if sent singly.

Parcels open to inspection and weighing not more than 4 lbs., may be sent to places in the United States at the rate of 1c. per oz.

Closed parcels not exceeding 5 lbs. in weight may be sent to and received from the United Kingdom, Newfoundland and all those countries and colonies with which the United Kingdom maintains a parcel post. Each parcel must be accompanied by a Customs Declaration, filled up by the sender. To United Kingdom and Newfoundland the rate is 25 cents per pound.

Full information in regard to the rates of postage to British Colonies and foreign countries, via England, or the United States, inland and foreign mail connections, the rules governing letters, newspapers, books, periodicals, samples and parcel post, and the transmission of post cards, ships letters, free matter, &c., may be obtained at any Post Office.

NOVA SCOTIA BIBLE SOCIETY.—*President*, Hon S. L. Shannon. *Treasurer*, S. H. Black. *Secretary*, James Farquhar. *Agent*, T. M. Mackelvie. A large committee of gentlemen of various religious denominations is appointed annually. Its object is "to encourage a wider circulation of the Holy Scriptures without note or comment."

HALIFAX LADIES' BIBLE ASSOCIATION.—*Pres.*, Mrs Liddell. *Sec'y*, Miss F. Pryor. This Society collects funds for the purpose of circulating the Scriptures among the poor and destitute. When a balance remains in the Treasurer's hands at the close of the year, the amount is given to the Nova Scotia Bible Society.

BRITISH AMERICAN BOOK AND TRACT SOCIETY.—*Pres.*, W. C. Silver. *Treas.*, E.L. Thorne. *Honorary Secretary*, Rev Robert Murray. These office-bearers with a Board of Directors composed of clergymen and laymen of various denominations, are elected annually. The Society was incorporated in 1872. Its expenditures in twenty-two years amounted to about \$600,000. It received in donations over \$86,000; and it circulated publications to the value of nearly \$480,000. About \$150,000 have been spent in Colportage,—and 235 years of labour were devoted to this object. Religious Books, Tracts, Magazines, Sabbath School Papers, Libraries at half price, &c., are specialties of the Society's Depository, 117 Granville St., Halifax.

EVANGELICAL ALLIANCE.—*President*, Hon S. L. Shannon; *Sec'y*, Rev. Robert Murray. The Evangelical Alliance is a Society intended to promote united action among christians of different denominations in so far as they are agreed.

CLAYTON & SONS, Boys' and Men's Clothing, WHOLESALE AND RETAIL.

YOUNG MEN'S CHRISTIAN ASSOCIATION.—*President*, J. C. Mackintosh *Treasurer*, S. H. Black. *Sec'y*, Henry Theakston. The Halifax Young Men's Christian Association was organized in December, 1853. Its object is the improvement of the "spiritual, moral, mental and social condition of the young men of the City of Halifax." It owns a handsome building which has cost over \$40,000. It has a large Library and a spacious and well supplied Reading Room: also Committee Rooms, Class Rooms, Parlor, Lecture Hall and Dining Room.—Any person of good moral character may become a member, but no one can serve on committee or be an officer of the Association without being a member in good standing of some Evangelical Church.

CONVENTION OF THE Y. M. C. A. OF MARITIME PROVINCES.—*President*, Dr. W. S. Morrison, St John *Secretaries*, A. D. Ross, Amherst; J. M. Laurence, St John, N. B.

WOMAN'S CHRISTIAN ASSOCIATION—*President*, Mrs J. Farquharson. *Vice-President*, Mrs D. McPherson. *Secretary*, Miss F. Pryor. F. L. Parsons.

HALIFAX INFANTS' HOME—The object of this Home is to receive and care for destitute infants. Its affairs are managed by a Committee of ladies. The annual expenditure amounts to about \$3000. The number of infants in the Home at any one time is about thirty-five. When the children are about two years old they are given out to be adopted by families in the country. Over two hundred have been thus provided for within the past thirteen years. Miss Nordbeck, *Treas.*, Studley. Mrs E. M. Saunders, *Sec'y.*, Carlton Street.

HOME FOR THE AGED—This place is intended to afford a comfortable retreat to respectable women of advanced years whose means of livelihood are very limited. Eighty dollars a year paid by the inmate or by a friend secures all the comforts of a home. The Institution owes its existence to the thoughtful liberality of the late William Murdoch, Esq. *President*, Mrs J. Scott Hutton. *Secretary*, Miss Forrest. *Treas.*, Miss A. Nordbeck.

PROTESTANT ORPHANS' HOME—Protestant orphans, two years old and upwards, are admitted to this Institution. It enjoys considerable endowments. Comfortable homes in the country are sought out and secured for boys and girls as they grow up. *Secretary*, Mrs R. Pickford, *Treasurer*, Miss B. Naylor.

PROTESTANT INDUSTRIAL SCHOOL.—Intended to teach and train for some useful occupation boys who might otherwise be left to grow up as "roughs" and criminals. It is under the management of a committee of gentlemen and ladies. *Chairman*, S. M. Brookfield, *Secretary*, E. D. Meynell. *Surgeon*, Dr. Lindsay. *Superintendent*, Robt Norman.

HALIFAX VISITING DISPENSARY.—Medical aid is afforded by this Institution to hundreds of poor patients. Those who need such attention are visited by Physicians at their homes. Those who can come to the Dispensary at the proper hour are duly attended to there. *President*, W. C. Silver. *Treas.*, J. F. Kenny. *Sec'y*, W. H. Wiswell.

Port of Halifax—Signal Service.

EXPLANATION OF SIGNALS.

Made on Main Signal Staff at Citadel Hill, when Vessels are seen from the Citadel or reported from an Outpost.

When Sailing Vessels are reported from an outpost, the following signals are made on the lower yard :

BY DAY.

For 1 Square Rigged vessel, 2 balls close up, one on the outer halliard and one on the inner halliard.

" 2 Do, 1 ball hoisted on the outer halliard and one close up on the inner halliard ; outer ball dropped.

" 3 Do, 2 balls close up, one on outer and one on inner halliard.

" 4 Do, 2 balls separated, and one close up on the inner halliard.

" 5 Do, a penant of any colour on the outer halliard, and one ball close up inside.

" 6 Do, a penant under a ball close up on the outer halliard, and a ball at the inner halliard close up.

" 7 Do, a penant over a ball close up on the outer halliard, and a ball close up on the inner halliard.

" 8 Do, a penant under two balls close up on the outer halliard with a ball close up on the inner halliard.

" 9 Do, a penant between two balls close up on the outer halliard with a ball close up on the inner halliard.

For 10 Do, a flag of any colour close up on the outer halliard, with a ball close up on the inner halliard.

The above balls, &c., are hoisted on the east or west yard arm, according to the quarter the vessel first appears in.

A Ship, a large ball at end of yard, with a small one at inner halliard.

A Barque, a large do at the end, with a small one dropped at inner halliard.

A Brig, a small one at end of yard, and a large one at inner halliard.

A Brigantine, a cross close up at the outer halliard. Two or more do, a cross half hoisted.

A Topsail Schooner, or Schooner wearing a Merchant's Private Signal, a cross close up at the inner halliard.

Two or more schooners, a cross inner, half hoisted.

The upper yard of the Ship Staff is used solely to designate Steam Vessels thus :

Two large balls close up, one at the outer and the other at the inner halliard, E or W, a steamer reported in that quarter.

A small ball at the outer, and a large one at the inner halliard, a very small or regular coasting Steamer.

A large ball at the outer, and a small one at the inner halliard, a large or ocean going Steamer.

Steamers or Sailing Vessels showing owners' or agents' private signal flags, are denoted on the private Signal Staff with a small descriptive penant underneath the private signal.

When the description of vessel is ascertained, the following descriptive colors will be hoisted at the masthead, and the inner ball taken down :

A Union Jack—a Flag Ship.

Man-of-War Screw Steamer, steamer penant, over the Union Jack.

Man-of-War Paddle Steamer, steamer penant under the Union Jack.

DIRECTIONS TO MARINERS WITH REFERENCE TO CANADIAN STORM WARNINGS, ISSUED FOR QUEBEC AND THE MARITIME PROVINCES.

I.—Cone, hoisted with the apex downwards, indicates "moderate gale is expected," probably at first from an easterly direction.

II.—Cone, with apex pointing upwards, indicates "moderate gale is expected," probably at first from a westerly direction.

III.—Drum, with Cone underneath, the apex pointing downwards, indicates fresh to heavy gale is expected, probably at first from a easterly direction.

IV.—Drum, with Cone above, the apex pointing upwards, indicates fresh to heavy gale is expected, probably at first from a westerly direction.

The Cone, when hoisted by itself, indicates that it is expected that the wind will obtain a velocity of 30 miles an hour, but will not exceed 40 miles; and it is not intended that an ordinary well found vessel should stay in port, but simply as a warning to mariners that strong winds are expected from the quarter indicated.

The Drum will always be hoisted when the velocity of the wind is expected to exceed 40 miles an hour.

The night signal, corresponding to Nos. 1 and 3, is two white lanterns hanging perpendicular.

The night signal, corresponding to Nos. 2 and 4, is two white lanterns hanging horizontally.

NOTES.—Mariners will be able to obtain further information from Drum Agents, or by consulting the daily probabilities. Mariners must always bear in mind that the storm signals are merely cautionary, and do not necessarily mean that a storm will occur at the place where the signal is displayed, but that one is expected either there or within such a distance that vessels leaving port would be liable to be caught in it.

The storm warnings issued for Nova Scotia, are received from the Central Office, Toronto, Ont.

TEMPERANCE DIRECTORY.

SONS OF TEMPERANCE.—The first Division was organized at Yarmouth, Nov. 17, 1847. The Grand Division was organized April 22, 1848, incorporated in 1851. There are now three hundred and eleven (311) Subordinate Divisions with seventeen thousand (17,000) members,—100 Bands of Hope with 5000 members; *Grand Worthy Patriarch*, Firman McClure, Truro; *Grand Scribe*, William S. Saunders, Halifax. Office 183 Hollis St. *Agents and Lecturers of Grand Division*, Thomas Hutchings and Thomas M. Lewis. Geo. H. Mackinlay, Halifax, *Secretary of Juvenile Organizations*. Quarterly sessions of G. D. are held in New Glasgow in January, Wolfville in April, Amherst in July. The annual session is to be held next autumn in Halifax.

INDEPENDENT ORDER OF GOOD TEMPLARS.—The first Lodge in this province was organized at Economy, Colchester, July 4th, 1864. The Grand Lodge was formed February 5th, 1867. In 1876 the disruption occurred on the "colored membership" question, and the N. S. Grand Lodge went with the British and other Grand Bodies and were known as "I. O. G. T. of the World." In November, 1876, a new Grand Lodge was formed of "Loyal" members to the Original Order "American," and two Grand Lodges conducted the Templar movement for eleven years. Union was constantly talked and worked for, and on 7th July, 1887, in New Glasgow, was consummated. The R. W. G. Lodges coalesced the same summer amid great rejoicing wherever Templarism exists.

The chief officers of the United Grand Lodge are *G. W. Chief Templar*, William Smith, New Glasgow; *Secretary*, J. B. Black, Halifax; *Sup. of Juvenile Templars*, Crofton Dickie, Halifax. No. of Lodges, 138, with membership of 6600; No. Juvenile Templars, 28, with 1222 members. The next Annual Session will be held in Acadia Mines, Col., commencing 1st Tuesday in July, 1891.

THE WOMEN'S CHRISTIAN TEMPERANCE UNION (WHITE RIBBON), has over 500,000 members throughout the world, and is rapidly increasing in every country. Miss Frances Willard of Chicago, is at head of this movement. Miss Sarah Robinson, 14 Hurds Lane, is President of the Halifax Union, and Miss E. B. Hart, 51 Lockman St., Halifax, *Cor. Secy.* **THE NORTH END W. C. T. U.**—*President*, Mrs. A. M. Bell, Hawthorne Place; *Cor. Sec'y*, Mrs. Howard McLean, 23 North Park St.

THE W. C. T. U. of the Maritime Provinces numbers about 3,000 members. *Pres.*, Mrs. W. W. Turnbull, St. John. *Cor. Sec'y.*, Mrs. Judge Steadman, Fredericton. *Rec. Sec'y.*, Miss Sarah Robinson, Halifax. The next Annual Meeting will be held at Charlottetown, P. E. I., in September, 1891.

THE N. S. BRANCH OF DOMINION TEMPERANCE ALLIANCE consists of delegates from all other societies, combining for united action to secure advanced legislation and to enforce existing laws. The officers are:—*President*, Walter McCurdy, Mid. Musquodoboit. *Vice-Presidents*, Rev. R. F. Burns, D.D., Halifax; Rev. S. F. Huestis, Halifax; J. Parsons, Halifax; P. A. McGregor, New Glasgow; Rev. J. S. Coffin, Sydney; Andrew Kirkpatrick, Shubenacadie; Bowman Corning, Yarmouth. *Secretary*, Firman McClure, Truro. *Treasurer*, D. W. B. Reid, Mid. Musquodoboit. The next Annual Meeting will be held in Halifax (time to be fixed by the Executive).

THE CHURCH TEMPERANCE SOCIETIES and Unions are important factors in this great Moral Reform. Catholics and Protestants of all names are working by means of societies within their own borders, and many of the active supporters of church societies are leaders of the above named organizations.

SOMETHING ABOUT ALMANACS.

The first almanack in England was printed in Oxford, in 1673. An English paper tells a pleasant anecdote of Partridge, the celebrated almanack maker, about 100 years since. In travelling on horseback into the country, he stopped for his dinner at an inn, and afterward called for his horse, that he might reach the next town, where he intended to sleep.

"If you will take my advice, Sir," said the hostler, as he was about to mount his horse, "you will stay where you are for the night, as you will surely be overtaken by a pelting rain."

"Nonsense, nonsense," exclaimed the almanack maker; "there is a sixpence for you, my honest fellow, and good afternoon to you."

He proceeded on his journey, and sure enough he was well drenched in a heavy shower. Partridge was struck by the man's prediction, and being always intent on the interest of his almanack, he rode back on the instant, and was received by the hostler with a broad grin.

"Well, sir, you see I was right after all."

"Yes, my lad, you have been so, and here is a crown for you; but I give it to you on condition that you tell me how you knew of this rain."

"To be sure, sir," replied the man; "the truth is, we have a Partridge's Almanack, and the fellow is such a notorious liar, that whenever he promises us a fine day, we always know that it will be the direct contrary. This day, the 21st of June is put down in our almanack as 'settled fine weather'; that is the reason I told you to put your horse out and stay here."—*Literary Anecdotes.*

SYDNEY COAL.

This celebrated Coal, mined by the **General Mining Association, Ltd., of London, G. B., at North Sydney, Cape Breton**, has long been generally known under the name of **Sydney Coal**, and this name is registered as a **Trade Mark**. To guard against deception from other coals being sold with the prefix of "**Sydney**," or as "**Sydney Coal**," a certificate is issued with each cargo of **Genuine Sydney Coal Shipped**.

"**Sydney Coal**" stands far ahead of all **Nova Scotian and Cape Breton Coals** in its reputation for **House Use**. It is also an excellent **Steam Coal**.

VICTORIA COAL.

This Coal is mined by the **Low Point, Barrasols and Lingan Mining Co., Ltd., at the Victoria Mines on Sydney Harbor, C. B.**

"**Victoria Coal**" is used more largely in **Nova Scotia** than any other **Cape Breton Coal** except **Sydney**. Besides being a favorite **House Coal**, it is a superior coal for **Steam Purposes**.
